Application: Road Tanker Filling

**Free Design Assistance
Available....
Please Enquire for details...**

A batch of 6, SN7000 series, Size 8 *OUTLOADERS* going thru' assembly. These *fully loaded* units were designed for road tanker filling of HC & LC Carbon (Ash) and were equipped with auto closer c/w integral level probe ; auto extend & retract sensors & were even fitted with operators remote pendant...In addition, due to the nature of the product, high frequency vibrators were fitted to the units to aid in reducing any build up at the end of a filling cycle. Part of the contract also included for the supply of our own SNE-RJC fan assisted filters to ensure dust free loading...

These heavy duty units are manufactured in house @ Gloucester and can be matched to almost any application needs. The *standard* units come in a host of lengths & configurations and are generally constructed utilising an outer bellow ; inner bellow & internal wear chutes for enhanced longevity in the field. Bellows can be supplied in a host of materials and can accommodate temperatures up to 200°C if required. Dust emissions are controlled via suitably sized suction thru' the outer & inner bellows via a 150Ømm extraction spigot. We can also, as part of the complete package, supply a suitably sized fan assisted filter to ensure compliance with EPA & HSE regulations.

Why entrust S N Engineering...

- UK design & built...
- Proven track record.....wealth of experience in materials handling & compliance issues...
- Host of optional "auxiliaries" for that complete supply...
- Units can be supplied suitable for *closed* road / rail tankers or for *open* trucks / barges & or ships.
- Basic push button pendant control to fully automated PLC control easily accommodated...
- Best practice design principles ensures maximum operational durability & thru' life yet ease of access for maintenance / replacement of parts should the unit become damaged.
