Half Build on 4 x SP series 3.5Ø bolted construction silo's. Supplied to OEM plant manufacturer for inclusion within their plant the silo's were supplied fully dressed and came complete with screw conveyor dischargers. Clients foresight to have the whole plant painted to match the local weather conditions was a brainwave!!!!

S N Engineering's flexible approach to clients requirements ensure limitations within the design brief can be accommodated without compromising the greater need, that of compliance. This flexible approach & well proven design & manufacturing process enables project specific units can be offered without the normal uplift in cost ; can be turned around quickly if required ; yet still maintain our quest for economical, soundly engineered & compliant equipment...
Single units from 20 to 1000m³, welded or bolted construction.

Why entrust S N Engineering...

- Full UK compliance...
- Proven track record...
- Jig built for high accuracy when building up...
- Flat packed for ease of worldwide shipping, easily fits into standard ISO containers....
- In House "dressings" for that complete supply.
- Stand alone units to complete turnkey "nests" easily accommodated.
- Various materials of construction, Mild Steel ; Aluminum or St. St. can be supplied... natural ; painted or HDG.
