SNE-RJC Series DUST FILTERS

A full range of standard & bespoke Dust Filtration Plants are readily available from **S N Engineering Ltd.**

Ranging from **stock** cylindrical silo venting units through to full blown filtration systems ensure clients environmental issues can be satisfied quickly, efficiently ; economically and most importantly in compliance with HSE / EPA legislation.

Utilising the latest developments & technology ensure that the various filtration medias, whether in Cylindrical Bag / Pleated Cartridge / Envelope Bag or Pleated Cell, meet the stringent emission legislation of the UK.

Casings range from Stainless Steel through to Powder Coated mild steel offering maximum durability dependant on clients application & final installation location.

With a wealth of experience in de-dusting a vast array of the UK's powder & granules you can feel confident that we can also assist you too.....

24m² Heavy gauge, powder coated for maximum durability, shown here with acoustic enclosure around fan assembly. Hinged lid with gas strut assistance ensure ease & safe access to the filtration media for maintenance & inspection. Units are supplied with air filter / regulators to ensure prime condition of air utilised for the clean down of the filter media....

Awaiting despatch 6 of 18 specially commissioned 84m² insertable units. Twin hinged *gull wing* doors each with gas strut assistance for ease of access.

S N ENGINEERING Ltd.

Opposite:-

62m² *Mini Wardrobe* type, stand alone filtration unit. Supplied with hopper & rotary valve on outlet. Twin hinged doors for ease of access to filtration area &/or fan...

Full acoustic enclosure around fan assembly c/w exhaust louvre

Low level air tank for ease of inspection &/or maintenance...

Batch of 52m², insertable type units along side a pair of specially designed 24m² fully fitted, tested ; packed & awaiting shipment...

248m² *Wardrobe* type unit.....

Shown during trial assembly prior to being supplied "flat packed" for client assembly @ site.

Due to the design & accuracy of manufacture, all of our units easily lend themselves to being supplied flat packed. That, in conjunction with, the high accuracy of the manufacturing phase - using the latest laser profiling technology - the client is assured of easy ; quick & accurate *own build*.

Ideal for those hard to get at locations where assembled units are just not feasible, they also have the addition of proving ideal for the export market.....of great appeal to those OEM clients that that enjoy an export trade...
